

**Title:** Ink Delivery Systems Integration Specialist

**Contract:** Permanent

**Intro:** Global Inkjet Systems Ltd (GIS), part of Nano Dimensions group, has a dynamic environment – which requires individuals who can adapt and respond. Global Inkjet Systems is high-tech company requiring skills and understanding in both inkjet printing and electronics.

**Role:**

This position is a great opportunity for an ambitious Engineer to join a dedicated team of Engineers developing products for industrial inkjet printers.

The successful applicant will take the lead in working with customers to integrate the ink delivery system into their machines. This will include remote diagnostics over the phone as well as some on-site visits. A proactive approach in contacting customers to ensure a speedy resolution of a problem is essential.

Hands-on lab work is an important part of the role, either to reproduce customer issues or to contribute to further development of the product.

Due to the nature of the role, some out-of-hours work to support international customers is to be expected.

**Essential skills:**

- Strong interest in working with customers
- Excellent verbal and written communication skills
- A good understanding of physics, software, electronics and mechanical design
- Hands-on mentality
